Subject Index

Actinomycosis, disseminated *Actinomyces meyeri* infection resembling lung cancer with brain metastases, 326(3):152–155
Acupuncture, for sleep-related laryngospasm, 326(2):107–109
Adolescents
adolescents and tobacco: what we know and don't know, 326(4):235–237
trends and patterns of tobacco use in United States, 326(4):248–254
African Americans, characteristics of African American smokers, 326(4):212–215
Airway, cigarette smoke-induced airway inflammation as sampled by expired breath condensate, 326(4):174–178
Amyloidosis, acute secondary gastrointestinal amyloidosis in patient with rheumatoid arthritis, 326(3):145–147
Angioedema with hypereosinophilia syndrome, intravenous immunoglobulin therapy suppresses manifestations of, 326(2):94–97
Antibacterial resistance, current issues in management of bacterial respiratory tract disease, 326(6):360–368
Anticoagulation, simultaneous testing of heparin effect on soluble phase and platelet component of hemostasis, 326(6):345–352
Asthma, extraesophageal manifestations of gastroesophageal reflux disease, 326(5):285–299
Autonomic dysfunction, unusual cause of partially reversible severe cardiovascular autonomic failure, 326(3):159–163

Barrett esophagus
clinical manifestations and esophageal complications of gastroesophageal reflux disease, 326(5):279–284
epidemiology of gastroesophageal reflux disease, 326(5):264–273
Biliary tract disease, unusual case of cholecystitis, 326(2):105–106
Brain abscess, disseminated *Actinomyces meyeri* infection resembling lung cancer with brain metastases, 326(3):152–155
Bupropion, treating nicotine dependence, 326(4):183–186

Cardiac output, abnormal impedance cardiography predicts symptom severity in chronic fatigue syndrome, 326(2):55–60
Cardiology Grand Rounds from The University of North Carolina at Chapel Hill
clinical and transthoracic echocardiographic predictors of abnormal transesophageal findings in patients with suspected cardiac source of embolism, 326(1):31–34
current status of immune modulating therapy for myocarditis: a case of acute parvovirus myocarditis treated with intravenous immunoglobulin, 326(6):369–374
Cardiovascular health and disease
clinical and transthoracic echocardiographic predictors of abnormal transesophageal findings in patients with suspected cardiac source of embolism, 326(1):31–34
current status of immune modulating therapy for myocarditis: a case of acute parvovirus myocarditis treated with intravenous immunoglobulin, 326(6):369–374
does it matter how we lower blood pressure?, 326(6):333–336
electrocardiographic manifestations in patients with thyrotoxic periodic paralysis, 326(3):128–132
giant left ventricular pseudoaneurysm as a late sequela of aortic valve endocarditis, 326(6):375–377
renin-angiotensin-aldosterone system: cardiorenal effects and implications for renal and cardiovascular disease states, 326(1):15–24
smoking cessation in women with cardiac risk, 326(4):192–196
unusual cause of partially reversible severe cardiovascular autonomic failure, 326(3):159–163
Cholecystitis, unusual case of, 326(2):105–106
Cholesterol embolization, unusual case of cholecystitis, 326(2):105–106
Chronic fatigue syndrome, abnormal impedance cardiography predicts symptom severity in, 326(2):55–60
Cirrhosis, hypersplenism in patients with, 326(3):111–116
Clinical trials, novel use for word "trend" in clinical trial literature, 326(2):61–65
Congestive heart failure
giant left ventricular pseudoaneurysm as a late sequela of aortic valve endocarditis, 326(6):375–377
renin-angiotensin-aldosterone system: cardiorenal effects and implications for renal and cardiovascular disease states, 326(1):15–24
Consultation, using a general internal medicine consult service to teach residents and care for patients, 326(2):73–78
Contrast media, exposure to radiologic contrast media and increased risk of treated end-stage renal disease, 326(6):353–359
Copper, effect of silica exposure on urinary excretion of copper and zinc, 326(3):122–127
Cough, extraesophageal manifestations of gastroesophageal reflux disease, 326(5):285–299
Creatine kinase, other medical causes of rhabdomyolysis, 326(2):79–88
Crohn disease, splenic granulomas in, 326(3):141–144
Cultural competence, building the case for, 326(3):136–140
Curriculum, using a general internal medicine consult service to teach residents and care for patients, 326(2):73–78
Cyclosporine A
simvastatin attenuates renal ischemia/reperfusion injury in rats administered cyclosporine A, 326(3):117–121
successful treatment with cyclosporin in adult-onset Still disease manifesting as acute hepatitis with marked hyperferritinemia, 326(3):148–151
Cytokines
intravenous immunoglobulin therapy suppresses manifestations of angioedema with hypereosinophilia syndrome, 326(2):94–97
metastatic carcinoma presenting with concomitant eosinophilia and thromboembolism, 326(2):98–101

Data interpretation, novel use for word "trend" in clinical trial literature, 326(2):61–65
Depression, smoking and depression in Chinese Americans, 326(4):187–191
Diagnosis
diagnostic tests for gastroesophageal reflux disease, 326(5):300–308
disseminated *Actinomyces meyeri* infection resembling lung cancer with brain metastases, 326(3):152–155
metastatic renal cell carcinoma of spleen diagnosed by fine-needle aspiration, 326(1):51–54
other medical causes of rhabdomyolysis, 326(2):79–88
Diarrhea, acute secondary gastrointestinal amyloidosis in patient with rheumatoid arthritis, 326(3):145–147
Drug adverse effects
hyponatremia associated with 3,4-methylenedioxymethylamphetamine ("Ecstasy") abuse, 326(2):89–93
oral medication-induced esophageal injury in elderly patients, 326(3):133–135

quinine induced HUS-TTP: unusual presentation, 326(6):378–000

Echocardiography, clinical and transthoracic echocardiographic predictors of abnormal transesophageal findings in patients with suspected cardiac source of embolism, 326(1): 31–34

"Ecstasy," hyponatremia associated with 3,4-methylenedioxymethylamphetamine abuse, 326(2):89–93

Electrocardiography, electrocardiographic manifestations in patients with thyrotoxic periodic paralysis, 326(3):128–132

Empyema, surgical vs. nonsurgical treatment of empyema thoracis: outcomes analysis, 326(1):9–14

Endocarditis, giant left ventricular pseudoaneurysm as a late sequela of aortic valve endocarditis, 326(6):375–377

Endoscopy
- diagnostic tests for gastroesophageal reflux disease, 326(5):300–308
- management of gastroesophageal reflux disease, 326(5):309–318

Environmental exposure, effect of silica exposure on urinary excretion of copper and zinc, 326(3):122–127

Eosinophilia
- intravenous immunoglobulin therapy suppresses manifestations of angioedema with hypereosinophilia syndrome, 326(2):94–97
- metastatic carcinoma presenting with concomitant eosinophilia and thromboembolism, 326(2):98–101

Epidemiology
- of gastroesophageal reflux disease, 326(5): 264–273
- trends and patterns of tobacco use in United States, 326(4):248–254

Esophageal biopsy, diagnostic tests for gastroesophageal reflux disease, 326(5): 300–308

Esophageal injury
- clinical manifestations and esophageal complications of gastroesophageal reflux disease, 326(5):279–284
- epidemiology of gastroesophageal reflux disease, 326(5):264–273
- oral medication-induced, in elderly patients, 326(3):133–135

Essential thrombocytosis, paradoxical arterial emboli causing acute limb ischemia in patient with, 326(3): 156–158

Ferritin, successful treatment with cyclosporin in adult-onset Still disease manifesting as acute hepatitis with marked hyperferritinemia, 326(3): 148–151

Game theory, infectious diseases, non–zero-sum thinking, and the developing world, 326(2):66–72

Gastroesophageal reflux disease
- acupuncture therapy for sleep-related laryngospasm, 326(2):107–109
- clinical manifestations and esophageal complications of, 326(5):279–284
- diagnostic tests for, 326(5):300–308
- epidemiology of, 326(5):264–273
- extraesophageal manifestations of, 326(5):285–299
- management of, 326(5):309–318
- pathogenesis of, 326(5):274–278
- symposium introduction, 326(5):263

Gastrointestinal disorders
- acute secondary gastrointestinal amyloidosis in patient with rheumatoid arthritis, 326(3):145–147
- splenic granulomas in Crohn disease, 326(3):141–144

Genetics, of smoking related behavior, 326(4):168–173

Geriatric patients, oral medication-induced esophageal injury in, 326(3): 133–135

Global health, infectious diseases, non–zero-sum thinking, and the developing world, 326(2):66–72

Health care delivery, building the case for cultural competence, 326(3): 136–140

Heartburn
- clinical manifestations and esophageal complications of gastroesophageal reflux disease, 326(5):279–284
- pathogenesis of gastroesophageal reflux disease, 326(5):274–278

Hemolytic uremic syndrome (HUS), quinine induced HUS-TTP: unusual presentation, 326(6):378–000

Hemostasis, simultaneous testing of heparin effect on soluble phase and platelet component of hemostasis, 326(6):345–352

Heparin, simultaneous testing of heparin effect on soluble phase and platelet component of hemostasis, 326(6): 345–352

Histamine-2 receptor antagonists, management of gastroesophageal reflux disease, 326(5):309–318

Hodgkin disease, unusual cause of partially reversible severe cardiovascular autonomic failure, 326(3):159–163

3-Hydroxy-3-methylglutaryl-coenzyme A reductase inhibitors, simvastatin attenuates renal ischemia/reperfusion injury in rats administered cyclosporine A, 326(3): 117–121

Hyperkalemia, other medical causes of rhabdomyolysis, 326(2):79–88

Hypersplenism, in patients with cirrhosis, 326(3):111–116

Hypertension
- does it matter how we lower blood pressure?, 326(6):333–336
- renin-angiotensin-aldosterone system: cardiorenal effects and implications for renal and cardiovascular disease states, 326(1):15–24

Hyperthyroidism, electrocardiographic manifestations in patients with thyrotoxic periodic paralysis, 326(3): 128–132

Hypokalemia, electrocardiographic manifestations in patients with thyrotoxic periodic paralysis, 326(3): 128–132

Hyponatremia
- 3,4-methylenedioxymethylamphetamine ("Ecstasy") abuse and, 326(2):89–93
- symptomatic, treatment of, 326(1): 25–30

Imaging
- diagnostic tests for gastroesophageal reflux disease, 326(5):300–308
- exposure to radiologic contrast media and increased risk of treated end-stage renal disease, 326(6):353–359

Immunosuppressive agents
- acute secondary gastrointestinal amyloidosis in patient with rheumatoid arthritis, 326(3):145–147
- simvastatin attenuates renal ischemia/reperfusion injury in rats administered cyclosporine A, 326(3):117–121
- successful treatment with cyclosporin in adult-onset Still disease manifesting as acute hepatitis with marked hyperferritinemia, 326(3):148–151

Impedance cardiography, to predict symptom severity in chronic fatigue syndrome, 326(2):55–60

Infection
- current issues in management of bacterial respiratory tract disease: challenge of antibacterial resistance, 326(6):360–368
- current status of immune modulating therapy for myocarditis: a case of acute parvovirus myocarditis treated with intravenous immunoglobulin, 326(6):369–374
- disseminated *Actinomyces meyeri* infection resembling lung cancer with brain metastases, 326(3):152–155
- infectious diseases, non–zero-sum thinking, and the developing world, 326(2): 66–72
- surgical vs. nonsurgical treatment of empyema thoracis: outcomes analysis, 326(1):9–14

Intravenous immunoglobulin
- current status of immune modulating therapy for myocarditis: a case of acute parvovirus myocarditis treated with intravenous immunoglobulin, 326(6):369–374
- manifestations of angioedema with hypereosinophilia syndrome suppressed by, 326(2):94–97

Ischemia
- attenuated by simvastatin in rats administered cyclosporine A, 326(3): 117–121
- paradoxical arterial emboli causing acute limb ischemia in patient with essential thrombocytosis, 326(3): 156–158

Laryngitis, extraesophageal manifestations of gastroesophageal reflux disease, 326(5):285–299
Laryngospasm, sleep-related, acupuncture for, 326(2):107–109
Left ventricular structure and function
clinical and transthoracic echocardiographic predictors of abnormal transesophageal findings in patients with suspected cardiac source of embolism, 326(1):31–34
renin-angiotensin-aldosterone system: cardiorenal effects and implications for renal and cardiovascular disease states, 326(1):15–24
Leukopenia, hypersplenism in patients with cirrhosis, 326(3):111–116
Liver
hypersplenism in patients with cirrhosis, 326(3):111–116
splenic granulomas in Crohn disease, 326(3):141–144
successful treatment with cyclosporin in adult-onset Still disease manifesting as acute hepatitis with marked hyperferritinemia, 326(3):148–151
Lower esophageal sphincter, pathogenesis of gastroesophageal reflux disease, 326(5):274–278
Lung cancer
disseminated *Actinomyces meyeri* infection resembling lung cancer with brain metastases, 326(3):152–155
unusual cause of partially reversible severe cardiovascular autonomic failure, 326(3):159–163
Lung disease, extraesophageal manifestations of gastroesophageal reflux disease, 326(5):285–299
Lymphoproliferative disorder, generalized vasculitis, thrombocytopenia, and transient lymphoproliferative disorder caused by idiopathic mixed cryoglobulinemia, 326(1):47–50

Medical education
building the case for cultural competence, 326(3):136–140
healthcare provider training in tobacco treatment: building competency, 326(4):242–247
using a general internal medicine consult service to teach residents and care for patients, 326(2):73–78
Medical literature, novel use for word "trend" in clinical trial literature, 326(2):61–65
Medications
current issues in management of bacterial respiratory tract disease: challenge of antibacterial resistance, 326(6):360–368
does it matter how we lower blood pressure?, 326(6):333–336
management of gastroesophageal reflux disease, 326(5):309–318
oral medication-induced esophageal injury in elderly patients, 326(3):133–135
quinine induced HUS-TTP: unusual presentation, 326(6):378–000
simvastatin attenuates renal ischemia/reperfusion injury in rats administered cyclosporine A, 326(3):117–121
treatment of symptomatic hyponatremia, 326(1):25–30
Metastases
cancer from an unknown primary site, 326(1):35–46
disseminated *Actinomyces meyeri* infection resembling lung cancer with brain metastases, 326(3):152–155
metastatic carcinoma presenting with concomitant eosinophilia and thromboembolism, 326(2):98–101
metastatic renal cell carcinoma of spleen diagnosed by fine-needle aspiration, 326(1):51–54
3,4-Methylenedioxymethylamphetamine ("Ecstasy") abuse, hyponatremia associated with, 326(2):89–93
Microalbuminuria, effect of silica exposure on urinary excretion of copper and zinc, 326(3):122–127
Mixed cryoglobulinemia, idiopathic, generalized vasculitis, thrombocytopenia, and transient lymphoproliferative disorder caused by, 326(1):47–50
Mortality, infectious diseases, non–zero-sum thinking, and the developing world, 326(2):66–72
Muscle, other medical causes of rhabdomyolysis, 326(2):79–88
Myocardial infarction, renin-angiotensin-aldosterone system: cardiorenal effects and implications for renal and cardiovascular disease states, 326(1):15–24
Myocarditis, current status of immune modulating therapy for myocarditis: a case of acute parvovirus myocarditis treated with intravenous immunoglobulin, 326(6):369–374

Neoplasia
cancer from an unknown primary site, 326(1):35–46
metastatic carcinoma presenting with concomitant eosinophilia and thromboembolism, 326(2):98–101
metastatic renal cell carcinoma of spleen diagnosed by fine-needle aspiration, 326(1):51–54
oral changes associated with tobacco use, 326(4):179–182
unusual cause of partially reversible severe cardiovascular autonomic failure, 326(3):159–163
Nicotine dependence. *See also* **Smoking/tobacco use**
female smoker: from addiction to recovery, 326(4):231–234
serious mental illness and tobacco addiction, 326(4):223–230
treatment of, 326(4):183–186

Occupational exposure, effect of silica exposure on urinary excretion of copper and zinc, 326(3):122–127
Oral cancer, oral changes associated with tobacco use, 326(4):179–182

Parvovirus infection, current status of immune modulating therapy for myocarditis: a case of acute parvovirus myocarditis treated with intravenous immunoglobulin, 326(6):369–374
Periodontal disease, oral changes associated with tobacco use, 326(4):179–182
Phosphate, molecular effects of volume expansion on renal sodium phosphate cotransporter, 326(1):1–8
Plasmapheresis
quinine induced HUS-TTP: unusual presentation, 326(6):378–000
thrombotic microangiopathy complicated with systemic lupus erythematosus, 326(2):102–104
Platelets, simultaneous testing of heparin effect on soluble phase and platelet component of hemostasis, 326(6):345–352
Pleural infection, surgical vs. nonsurgical treatment of empyema thoracis: outcomes analysis, 326(1):9–14
Pneumonia, surgical vs. nonsurgical treatment of empyema thoracis: outcomes analysis, 326(1):9–14
Poverty, infectious diseases, non–zero-sum thinking, and the developing world, 326(2):66–72
Pregnancy, smoking cessation or reduction in pregnancy treatment methods: meta-evaluation of impact of dissemination, 326(4):216–222
Proton pump inhibitors, management of gastroesophageal reflux disease, 326(5):309–318
Psychiatric disorders
serious mental illness and tobacco addiction, 326(4):223–230
smoking and depression in Chinese Americans, 326(4):187–191
Public health
public health issues in treating tobacco use, 326(4):255–261
smoking cessation research in primary care treatment centers: the SCRIPT-MS Project, 326(4):238–241
Purpura, generalized vasculitis, thrombocytopenia, and transient lymphoproliferative disorder caused by idiopathic mixed cryoglobulinemia, 326(1):47–50

Quinine, HUS-TTP induced by: unusual presentation, 326(6):378–380

Race/ethnicity
building the case for cultural competence, 326(3):136–140
characteristics of African American smokers, 326(4):212–215

smoking and depression in Chinese Americans, 326(4):187–191
Renal cell carcinoma, metastatic, of spleen diagnosed by fine-needle aspiration, 326(1):51–54
Renal function and disease
effect of silica exposure on urinary excretion of copper and zinc, 326(3):122–127
exposure to radiologic contrast media and increased risk of treated end-stage renal disease, 326(6):353–359
molecular effects of volume expansion on renal sodium phosphate cotransporter, 326(1):1–8
other medical causes of rhabdomyolysis, 326(2):79–88
quinine induced HUS-TTP: unusual presentation, 326(6):378–000
renin-angiotensin-aldosterone system: cardiorenal effects and implications for renal and cardiovascular disease states, 326(1):15–24
simvastatin attenuates renal ischemia/reperfusion injury in rats administered cyclosporine A, 326(3):117–121
Renin-angiotensin-aldosterone system, cardiorenal effects and implications for renal and cardiovascular disease states, 326(1):15–24
Residency training. *See also* Medical education
using a general internal medicine consult service to teach residents and care for patients, 326(2):73–78
Respiratory tract infection, current issues in management of bacterial respiratory tract disease: challenge of antibacterial resistance, 326(6):360–368
Rhabdomyolysis, other medical causes of, 326(2):79–88
Rheumatoid arthritis, acute secondary gastrointestinal amyloidosis in patient with, 326(3):145–147

Schizophrenia, serious mental illness and tobacco addiction, 326(4):223–230
Signal transduction, molecular effects of volume expansion on renal sodium phosphate cotransporter, 326(1):1–8
Silica exposure, effect on urinary excretion of copper and zinc, 326(3):122–127
Sleep-related laryngospasm, acupuncture for, 326(2):107–109
Smoking/tobacco use
adolescents and tobacco: what we know and don't know, 326(4):235–237
characteristics of African American smokers, 326(4):212–215
cigarette smoke-induced airway inflammation as sampled by expired breath condensate, 326(4):174–178
female smoker: from addiction to recovery, 326(4):231–234
genetics of smoking related behavior, 326(4):168–173
healthcare provider training in tobacco treatment: building competency, 326(4):242–247
it ain't over till it's over: the case for offering relapse-prevention interventions to former smokers, 326(4):197–200
oral changes associated with tobacco use, 326(4):179–182
public health issues in treating tobacco use, 326(4):255–261
quitlines in North America: evidence base and applications, 326(4):201–205
serious mental illness and tobacco addiction, 326(4):223–230
smoking and depression in Chinese Americans, 326(4):187–191
smoking cessation in women with cardiac risk, 326(4):192–196
smoking cessation or reduction in pregnancy treatment methods: meta-evaluation of impact of dissemination, 326(4):216–222
smoking cessation research in primary care treatment centers: the SCRIPT-MS Project, 326(4):238–241
taking on tobacco: need for a comprehensive approach, 326(4):167
tobacco update: scientific advances, clinical perspectives, 326(4):165–166
treating nicotine dependence, 326(4):183–186
trends and patterns of tobacco use in United States, 326(4):248–254
what have we learned from 20 years of research on smokeless tobacco cessation?, 326(4):206–211
Sodium
hyponatremia associated with 3,4-methylenedioxymethylamphetamine abuse, 326(2):89–93
molecular effects of volume expansion on renal sodium phosphate cotransporter, 326(1):1–8
treatment of symptomatic hyponatremia, 326(1):25–30
Southern Society for Clinical Investigation (SSCI), 326(6):320–322
2003 Founders' Medal recipient's address, 326(6):323–328
Board of Directors, 326(6):337–339
celebrating SSCI: drug discovery pathway: challenges and pitfalls, 326(6):329–332
constitution, bylaws, and amendments, 326(6):340–344
new and improved SSCI, 326(6):319
presentation of 2003 Founders' Medal to Dr. Jules B. Puschett, 326(6):320–322
Southwestern Internal Medicine Conference, cancer from an unknown primary site, 326(1):35–46
Spleen
hypersplenism in patients with cirrhosis, 326(3):111–116
metastatic renal cell carcinoma of spleen diagnosed by fine-needle aspiration, 326(1):51–54
splenic granulomas in Crohn disease, 326(3):141–144
Statins, simvastatin attenuates renal ischemia/reperfusion injury in rats administered cyclosporine A, 326(3):117–121
Statistics, novel use for word "trend" in clinical trial literature, 326(2):61–65
Still disease, successful treatment with cyclosporin in adult-onset Still disease manifesting as acute hepatitis with marked hyperferritinemia, 326(3):148–151
Stroke volume, abnormal impedance cardiography predicts symptom severity in chronic fatigue syndrome, 326(2):55–60
Stomatitis, oral changes associated with tobacco use, 326(4):179–182
Substance use disorders
adolescents and tobacco: what we know and don't know, 326(4):235–237
characteristics of African American smokers, 326(4):212–215
cigarette smoke-induced airway inflammation as sampled by expired breath condensate, 326(4):174–178
female smoker: from addiction to recovery, 326(4):231–234
genetics of smoking related behavior, 326(4):168–173
healthcare provider training in tobacco treatment: building competency, 326(4):242–247
hyponatremia associated with 3,4-methylenedioxymethylamphetamine ("Ecstasy") abuse, 326(2):89–93
it ain't over till it's over: the case for offering relapse-prevention interventions to former smokers, 326(4):197–200
oral changes associated with tobacco use, 326(4):179–182
public health issues in treating tobacco use, 326(4):255–261
quitlines in North America: evidence base and applications, 326(4):201–205
serious mental illness and tobacco addiction, 326(4):223–230
smoking and depression in Chinese Americans, 326(4):187–191
smoking cessation in women with cardiac risk, 326(4):192–196
smoking cessation or reduction in pregnancy treatment methods: meta-evaluation of impact of dissemination, 326(4):216–222
smoking cessation research in primary care treatment centers: the SCRIPT-MS Project, 326(4):238–241
taking on tobacco: need for a comprehensive approach, 326(4):167
tobacco update: scientific advances, clinical perspectives, 326(4):165–166
treating nicotine dependence, 326(4):183–186
trends and patterns of tobacco use in United States, 326(4):248–254
what have we learned from 20 years of research on smokeless tobacco cessation?, 326(4):206–211

Surgery
management of gastroesophageal reflux disease, 326(5):309–318
vs. nonsurgical treatment of empyema thoracis: outcomes analysis, 326(1): 9–14
Systemic lupus erythematosus, thrombotic microangiopathy complicated with, 326(2):102–104

Telephone counseling, quitlines in North America: evidence base and applications, 326(4):201–205
Thrombocytopenia
generalized vasculitis, thrombocytopenia, and transient lymphoproliferative disorder caused by idiopathic mixed cryoglobulinemia, 326(1): 47–50
hypersplenism in patients with cirrhosis, 326(3):111–116
quinine induced HUS-TTP: unusual presentation, 326(6):378–000
Thromboembolic disorders
clinical and transthoracic echocardiographic predictors of abnormal transesophageal findings in patients with suspected cardiac source of embolism, 326(1):31–34
metastatic carcinoma presenting with concomitant eosinophilia and thromboembolism, 326(2):98–101
paradoxical arterial emboli causing acute limb ischemia in patient with essential thrombocytosis, 326(3): 156–158
quinine induced HUS-TTP: unusual presentation, 326(6):378–000
thrombotic microangiopathy complicated with systemic lupus erythematosus, 326(2):102–104
Thyrotoxic periodic paralysis, electrocardiographic manifestations in patients with, 326(3):128–132
Transplantation, simvastatin attenuates renal ischemia/reperfusion injury in rats administered cyclosporine A, 326(3):117–121

Urea, treatment of symptomatic hyponatremia, 326(1):25–30

Vasculature
generalized vasculitis, thrombocytopenia, and transient lymphoproliferative disorder caused by idiopathic mixed cryoglobulinemia, 326(1): 47–50
paradoxical arterial emboli causing acute limb ischemia in patient with essential thrombocytosis, 326(3): 156–158
simvastatin attenuates renal ischemia/reperfusion injury in rats administered cyclosporine A, 326(3):117–121
thrombotic microangiopathy complicated with systemic lupus erythematosus, 326(2):102–104
Volume expansion. molecular effects on renal sodium phosphate cotransporter, 326(1):1–8

Women
female smoker: from addiction to recovery, 326(4):231–234
smoking cessation in women with cardiac risk, 326(4):192–196
smoking cessation or reduction in pregnancy treatment methods: meta-evaluation of impact of dissemination, 326(4):216–222

Zinc, effect of silica exposure on urinary excretion of copper and zinc, 326(3): 122–127
